

How important is the X16 service to you ?

As part of the 2017-2018 Newport City Council budget there are plans to remove the subsidy to this service. This may well influence whether or not the provider continues to operate through Marshfield !

You can view and respond to the budget proposals using the City Council Website !

Your local city and community councillors intend to oppose these plans and represent the views of the users in this case. Please come along to a session with local Councillors and representatives from City Council to discuss this plan in more detail and let us know why this service is so important to you !

Community Councillor Mathew Taylor can be contacted on - 07598128602, He will call you back to discuss this in more detail and arrange to meet you in person to gather your views if you wish.
